### *Garmap Product Options & Benefits*

**Question:** How can I purchase Garmap mapping for my Garmin GPS?

**Answer:** Garmap mapping for your Garmin GPS unit is sold in a variety of ways. It can be purchased on a disc (DVD), as a pre-programmed SD card or downloaded from our website ([www.garmap.co.za](http://www.garmap.co.za)). Please see below for the benefits of each format:

**DVD:**

Garmap maps purchased in this format will require a computer to use and will allow you to plan trips on your computer and transfer waypoints, routes and tracks to your GPS device. The installation process, which requires an Internet connection, will install the map and the MapSource application to your computer. MapSource can then be used to send maps to either your device or an SD card. Please note that mapping products in this format are unlocked to a **single** device and they are non-transferable. Maps in this format can be updated by purchasing a mapping update, when available. Garmap DVDs, of the same edition, contain the identical data which includes all the current map sets (in all variants) available at the time of release.

Garmap DVDs are available in 3 versions:

1. ***Retail Pack DVD.***

This version sells for R 20.00 inc VAT and contains all the current Garmap map data for all the various Garmap products. Having the map data available on the DVD will save users from doing large data downloads from the Internet during a map installation or upgrade. No map unlock licence is supplied with this DVD version. Qualifying free map upgrades will be processed without a payment but an Internet connection is required, during the map upgrade process, for validation.

In other instances e.g. when doing *new* map purchases or *paid for* upgrades, users will be required to make an on-line payment for map activation if using the Retail Pack DVD. In these cases, an Internet connection is required for both on-line payment and map validation but no download of map data from the web site will be necessary as the data is available directly off the DVD.

The *Retail Pack DVD* will have this label displayed on the front cover:

## **Garmap Product Options & Benefits (cont.)**

### 2. **Coupon Code Upgrade DVD.**

This version sells for R 349.00 inc VAT. The Coupon Code DVD has been designed to allow users to do any upgrade to the value of R349.00 without having to do an on-line payment. An Internet connection is required during the map upgrade process but this is only for map activation purposes. Although primarily designed for map upgrades, the Coupon Code DVD can also be used for on-line map purchases or to purchase map upgrades that cost more than the value of the Coupon. In these instances the value of the Coupon at R 349.00 will be deducted from the purchase price of the applicable map or upgrade and the user will then be able to pay the balance via an on-line payment.

The *Coupon Code Upgrade DVD* will have this label displayed on the front cover:

### 3. **Regional Licence Included DVD.**

These DVDs (there are 7 versions) are designed for new map purchases of a specific map product and carry correspondingly higher prices. Included within these DVDs is an unlock licence code for the specific map product that is being purchased. No on-line payment is necessary however an Internet connection is required for map activation. No downloading of map data is required as the data is available on the DVD.

The *Regional Licence Pack DVD* will have this label displayed on the front cover:

### **Pre-programmed SD cards:**

Pre-programmed SD cards (there are 7 versions) are immediately ready to use. These cards contain the full map for a specific Garmap product. Simply unpack the card and insert it into your compatible Garmin GPS device. These maps do not need to be unlocked to your device which allows you to use the SD card in multiple devices however you will **not** have access to the mapping on your computer. Garmap maps in this format would need to be purchased separately when a new version is released i.e. SD cards **DO NOT** have any upgrade facility.

## **Garmap Product Options & Benefits (cont.)**

### **Downloadable Content:**

Garmap maps purchased on-line can be downloaded directly from the Garmap website ([www.garmap.co.za](http://www.garmap.co.za)). This is "possibly" the quickest method of getting the latest mapping. Garmap maps purchased in this format will require a computer to use and will allow you to plan trips on your computer and transfer waypoints, routes and tracks to your GPS device. The installation process, which requires an Internet connection, will install the mapping and the MapSource application to your computer. MapSource can then be used to send maps to either your device or an SD card. Please note that mapping products in this format are unlocked to a single device and they are non-transferable. Maps in this format can be updated by purchasing a mapping update, when available.

*Kindly note that **no** map unlock licence is supplied when a map is downloaded from the Garmap web site. In the event that an unlock licence is required e.g. when purchasing a new map or doing a paid for upgrade; it will then become necessary for users to make an on-line payment for the map to be activated (unlocked).*

**Note:** Before selecting a purchase option, be sure to review the requirements of the individual mapping product to ensure your device and/or computer will work with the selected format. The above are only valid for original, legally acquired & licensed Garmap products (with valid Product Serial Numbers (PSN)) supplied by a Garmin Distribution Africa (Pty) Ltd ("GDA") authorised Business Partner and/or purchased from the Garmap (Pty) Ltd ("Garmap") website. Our standard Terms & Conditions of Trade apply.

***All Garmap products are licensed for use with a single Garmin GPS unit only.***

### **Support:**

Any queries with regards to the above can be directed to the **Garmap Support Team** on telephone no. 0861-GARMAP / 427-627 or +27 (0)11 251-9800.
